

# Chaos Engineering Resilience Report

Project: default\_project

Organization: default

Period: 1/1/2025 — 5/11/2026

Generated: 5/11/2026, 6:59:05 PM

# Executive Summary

|                               |           |
|-------------------------------|-----------|
| Total Experiments with Runs   | 3         |
| Total Experiment Runs         | 13        |
| Completed                     | 4         |
| Failed                        | 0         |
| Stopped                       | 7         |
| Errors                        | 1         |
| Overall Avg Resiliency Score  | 100 / 100 |
| Experiments Degrading         | 0         |
| Experiments Needing Attention | 2         |

Resilience Grade:

A

# Key Insights & Action Items

---

## pod-api-block-61ed27f6

! 1 of 1 runs were stopped prematurely — investigate why experiments are being halted.

## pod-api-block-61ed27f6

! No runs completed successfully — all were stopped or errored. This needs immediate attention.

## pod-api-block-61ed27f6

! No resiliency scores recorded — runs may have been stopped before faults could execute.

## poddeletekf4sm

! 5 of 10 runs were stopped prematurely — investigate why experiments are being halted.

## poddeletekf4sm

! 1 run(s) ended in error — check infrastructure connectivity and ChaosGuard rules.

## ec2-stop-id

! 1 of 2 runs were stopped prematurely — investigate why experiments are being halted.

## ec2-stop-id

! No runs completed successfully — all were stopped or errored. This needs immediate attention.

## ec2-stop-id

! No resiliency scores recorded — runs may have been stopped before faults could execute.

# pod-api-block-61ed27f6

## Run History

| # | Date                  | Phase                       | Score | Triggered By     |
|---|-----------------------|-----------------------------|-------|------------------|
| 1 | 3/23/2026, 1:17:14 PM | Completed_With_Probe_Absent | —     | Shashank Dwivedi |
| 2 | 4/15/2026, 4:04:10 PM | Stopped                     | —     | Shashank Dwivedi |

## Insights

- %, 1 of 2 runs were stopped prematurely — investigate why experiments are being halted.
- %, No runs completed successfully — all were stopped or errored. This needs immediate attention.
- %, No resiliency scores recorded — runs may have been stopped before faults could execute.

# Recommendations

---

%i CRITICAL: 2 experiment(s) had runs but none completed — investigate: pod-api-block-61ed27f6, ec2-stop-id

%i More runs were stopped (7) than completed (4) — review ChaosGuard rules and infrastructure stability.

%i 1 run(s) errored out — check chaos infrastructure connectivity and agent health.
